90.80 %

SKILLS

Frontend Skills	HTML, CSS, Javascript, React, Bootstrap, Tailwind
Backend Skills	Node.js, Express.js, MongoDB

PROJECTS

Airbnb Clone : Developed a fully functional Airbnb clone using Express.js, Node.js, MongoDB, EJS, HTML, CSS, and JavaScript. Key features include property listing management, review system with star ratings, user authentication, search/filter/sort capabilities, and responsive design with Bootstrap. Integrated Cloudinary for image storage, MapTiler for maps, and utilized technologies like Passport for authentication and Starability for ratings.
([Visit the Site](#))

Simon Memory Game : Created an interactive memory game with multiple levels and score tracking using HTML, CSS, and JavaScript. Implemented start, reset, and game over functionalities for an engaging user experience.
([Play Now](#))

Blog Webpage : Developed a fully responsive Blog Webpage using HTML and CSS, showcasing engaging blog posts with a clean and modern layout for optimal user experience.
([Check it Out](#))

Restaurant Landing Page : Crafted a landing page for the fictional restaurant 'Plate & Palette' optimized for desktop and laptop screens. Utilized HTML, CSS, and JavaScript with a focus on custom properties, Flexbox layout, and basic interactivity for menu tab switching.
